_			1	2	3		4	<u></u>	
A	History								
	Date (d/m/y)	Version	Note						
	02/12/2019	0.1	Draft version						
	04/12/2019	0.2	- Add resistors for CTs - Add 1.8V power for CTs - Add buffer ICs for MCU - Replace single transistors by darlington transistors array Fixbug						A
	07/12/2019	0.3	Add LED signal for relay Change CTs Add feedback signals from AC ports Add WAKE-UP pin for 3G module						
В	09/12/2019	0.4	- Add Buzzer - Add PCB document - Fixbug						
	12/12/2019	0.5	[x] Thêm chân nạp cho STM32 [x] Chinh số cho nguồn 3G (R1,R2) hoặc recommend cái nào thì tô đậm [x] Thêm test point cho mấy chỗ nguồn 12v, 3v3, 1v8 [x] Đèn led blink trạng thái chân B2 [x] Sim 5320 cũng ra hàng rào hoặc test point uart để test						В
	24/12/2019	0.6	- Add PCB layout						
	29/12/2019	0.7	- Fix bug						
	27/02/2020	1.0	-						
С	25/05/2020	2.0	- Pre-mass production (20 pcs)						
	12/03/2021	2.1	- Keep CTs 1 to 8 is 5A the same, the others change to 10A - Add wifi modules ESP-01 and ESP-05. Just use only one, the other for backup Bigger screw hole for more easy assembly - Fix the transformer footprint						С
	31/01/2023	3.0	New version with Thaco Stackable, easy install and remove Relay board add snubber Relay board resize and change connect to flat						
D			- Led board change to led & connector smd - Main board add New wifi/lan module - Main board resize for just 4 pair relay - Main board AC-filter to zero detection - Main board 485 - Mainboard realtime 32khz crrystal - Wirre connector on sub or main -> sub						D
